

José Bonilla

Web Application Engineer

ingjosebonilla@gmail.com | +58 424 5552793 | Venezuela | <https://www.linkedin.com/in/ing-jabc/>
<https://ing-jabc.vercel.app/>

Skills

Languages:	TypeScript, JavaScript, HTML, CSS, SQL
Frameworks:	React, Next.js, Node.js, Strapi
Databases:	PostgreSQL, MySQL
Technologies / Tools:	Git, GitHub, Docker, OpenCode, Claude, Supabase
Practices:	AI-first, Web development, Clean Code, Manteinable apps, Robust API's

Experience

Develsoft SAS

Full-stack developer

Feb 2023 – Mar 2026

Remote

- Architected and scaled production-grade multi-tenant applications using Next.js, NestJS, and TypeScript, achieving measurable improvements in modularity, maintainability, and runtime performance across the full stack. state management in production environments.
- Designed and optimized high-throughput RESTful APIs on NestJS with PostgreSQL-backed data pipelines, ensuring sub-100ms P95 response latency under concurrent production loads.
- Engineered responsive, component-driven UIs with React and Next.js, enforcing clean architecture patterns that reduced cross-team merge conflicts and accelerated feature delivery.

Projects

Nómadas Tour (Multi-tenant SaaS & Real-time Reservation System)

<https://nomadastours.vercel.app/>

Built a multi-tenant SaaS platform for travel agencies, enabling isolated workspaces, role-based access control, and real-time reservation management. Developed with Next.js App Router and TypeScript for a type-safe, scalable frontend. Implemented Tailwind CSS for a responsive modern UI and Supabase for authentication, PostgreSQL database management, Row Level Security, and real-time data synchronization across connected clients. Designed real-time seat availability, reservation workflows, QR-based ticket validation, and agency-specific data isolation.

Lupea (SaaS)

<https://www.lupea.app/>

Architected and deployed a highly scalable, real-time SaaS marketplace. Built the frontend with Next.js for optimal performance, backed by Strapi v5 as a headless CMS for agile content delivery. Engineered a custom matching engine driven by geospatial data, automating the connection between buyer demand and supplier availability.

Algira (Real-time System)

<https://algira-web.vercel.app/>

Engineered a real-time ticketing and raffle platform using Next.js with Strapi v5 as the headless backend. Implemented WebSocket-based live event streaming for transparent, trust-building draw visualization. Integrated Braintree with idempotent payment handling, ensuring zero financial discrepancies during high-concurrency purchase periods.

Paula Román — Asesora Jurídica (Landing Page)

<https://www.paularomanasesora.com/>

Designed and built a landing page with Next.js, TypeScript and Strapi as headless CMS. The page includes a hero with direct CTA, mentorship program overview, a 3-phase coaching cycle, client testimonials, and a contact section. All content is editable from Strapi without code changes.

Chau Deudas (Fintech)

<https://www.chaudeudas.com.uy/>

Engineered a secure, responsive single-page application in Next.js and TypeScript, rigorously translating complex Figma specifications into a pixel-perfect UI. Integrated with .NET Core REST APIs for financial transaction processing. Designed a resilient error-handling layer that maintained data integrity across network interruptions.

Develsoft SAS (Website)

<https://www.develsoft.dev/>

Architected a full-stack corporate website using Next.js and NestJS with end-to-end TypeScript, ensuring type-safety across the entire data flow. Engineered a clean, modular component architecture on the frontend with a NestJS-driven backend managing structured content via PostgreSQL. Automated Lighthouse scoring thresholds in CI.

Braganza Vial (Corporate website)

<https://www.braganzavial.com.uy/>

Migrated the backend to Strapi v5 with PostgreSQL, designing a full content structure for all site sections. Connected the existing frontend to the new CMS without altering the UI, and built a new "Clients" section with a logo grid manageable entirely from the admin panel.

Education

"Lisandro Alvarado " Central Western University (UCLA)

2012 – 2019

B.S. in Software Engineering, Software Engineering

Languages

Spanish: Native · English: C1 Advanced
